# GENERAL ADMISSION RULES

Students wanting to study at Walter Sisulu must meet the minimum admission requirements for admission to the qualifications listed below as set out by DHET, as well as the university's own qualification requirements, which are indicated per qualification.

|                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Higher Certificate</b>                                  | The minimum admission requirement is a National Senior Certificate with a minimum of 30% in the language of learning and teaching of the higher education institution as certified by Umalusi, the Quality Assurance Council. Institutional and programme needs may require additional combinations or recognised NSC subjects and levels of achievement.                                                                                                                    |
| <b>Diploma</b>                                             | The minimum admission requirement is a National Senior Certificate with a minimum of 30% in the language of learning and teaching of the higher education institution and an achievement rating of 3 (40-49%) or better for 4 recognised 20-credit subjects, excluding life orientation, as certified by Umalusi, the Quality Assurance Council. Institutional and programme needs may require additional combinations or recognised NSC subjects and levels of achievement. |
| <b>Bachelor's Degree</b>                                   | The minimum admission requirement is a National Senior Certificate with a minimum of 30% in the language of learning and teaching of the higher education institution and an achievement rating of 4 (50-59%) or better for 4 recognised 20-credit subjects, excluding life orientation, as certified by Umalusi, the Quality Assurance Council. Institutional and programme needs may require additional combinations or recognised NSC subjects and levels of achievement. |
| <b>Students with international school leaving results.</b> | Applications from students with international school leaving results are considered in terms of the "Higher Education South Africa (HESA) guideline document, " A guide to application for exemption certificates", and where required a submission of international qualification to SAQA for benchmarking in terms of HEQC.<br><br>These students will be assisted by WALTER SISULU's international office.                                                                |
| <b>Mature age endorsements</b>                             | Admission in terms of Mature Age Endorsement will be in terms of Rule 1.13 in the General Prospectus.                                                                                                                                                                                                                                                                                                                                                                        |

- Students applying for Diploma programmes must have a National Senior Certificate (NSC) with at least a diploma endorsement.
- Students applying for Degree programmes must have a National Senior Certificate (NSC) with a Bachelor's endorsement.
- Students with the old Senior Certificate or the NC(V) as well as students with international school leaving results should refer to the detailed Faculty prospectus for specific entry requirements.

# WALTER SISULU APS CONVERSION TABLE

Admission Point Scores (APS):

- An Admission Point Score (APS) measures a student's National Senior Certificate (NSC) or Senior Certificate (Old Matric) examination performance. iYunivesithi Walter Sisulu uses APS, in addition to subject specific requirements to determine if a student is eligible for admission to our programmes.
- The APS is calculated by adding together the point scores for a student's best six subjects, excluding Life Orientation.
- APS is determined on the WS classification table (six subjects: English and one other language subject) plus 4 subjects.
- The point score for each subject is based on the student's percentage mark which is converted to a point score using the table below.

| WALTER SISULU APS Conversion Tables                                                                                                                |                                                                                                                                                                                                                               |                         |  |                               |                         |          |                         |

| WALTER SISULU's APS conversion system allocates point values for a maximum of 6 Subjects, using the above table and the 2 categories listed below. |                                                                                                                                                                                                                               |                         |  |                               |                         |          |                         |
| Category 1                                                                                                                                         | 2 Subjects - Maximum of two Languages (Home Language and First Additional Language)                                                                                                                                           |                         |  |                               |                         |          |                         |
| Category 2                                                                                                                                         | 4 Subjects - The 4 subjects in which the student scored the highest marks, excluding life orientation and Category 1 subjects. The 4 subjects must include the subjects that are specifically required for the qualification. |                         |  |                               |                         |          |                         |

## Example of APS computation

The table below depicts how the APS score would be computed in the three scenarios below. Each percentage is converted into an APS score using the APS conversion table above. Student 1 and 3's APS was calculated using only Category 1 and Category 2

Student 2 wrote 8 subjects in the NSC exams. The qualification that the student applied for is the Bachelor of Education in Foundation Phase Teaching, which has Life Orientation as a teaching subject, and therefore Life Orientation is included in determining the APS scores. In line with the criteria for category 2 only the best 4 subjects were selected, and LO from Category 3 was included to make 7 subjects in total

# MTHATHA CAMPUS

## FACULTY OF ECONOMIC & FINANCIAL SCIENCES

The faculty is situated at the Mthatha campus and comprises four departments: the Department of Accounting Sciences, the Department of Auditing, the Department of Management Accounting & Finance, and the Department of Business Management & Economics. The faculty enrolls approximately 3,000 students each year.

The faculty offers a range of undergraduate and postgraduate programs. Notably, the Bachelor of Accounting Science is an accredited program by the South African Institute of Chartered Accountants (SAICA), catering to students interested in pursuing the Chartered Accountancy route.

The career opportunities for graduates from this faculty are diverse, encompassing roles such as Chartered Accountant, financial manager, tax consultant, auditor, management accountant, business manager, economist, financial analyst, business consultant, treasury analyst, risk manager, and financial planner.

Students have the option to pursue diploma programs in Accountancy, Financial Information Systems, and Internal Auditing. The bachelor's degrees offer specialisations in Accounting, Accounting Science (for the CA route), Business Management, Economics, and Commerce.

It serves as a foundational qualification for further studies in accounting and internal auditing. Graduates will have the expertise to assess financial records, contribute to organisational integrity, and pursue specialised certifications and career opportunities in the field.                                                                                                                                                                                                                                            |
| Bachelor of Accounting<br>W63008                      | 25                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language</li> <li>4 (50-59%) for Mathematics</li> </ul>                                                                                                                                                                                                                                                                                                                                    | The primary objective of this qualification is to adequately prepare and equip students with the essential financial, analytical, and managerial skills necessary for success in the fields of commerce and industry. By completing this program, students will develop a strong foundation in key areas, enabling them to navigate and excel in various professional settings. The program aims to cultivate the necessary competencies to make informed financial decisions, analyse data, and effectively manage resources within the dynamic and evolving landscape of commerce and industry.                                                                           |
| Bachelor of Accounting Sciences<br>W63009             | 27                                 | <ul style="list-style-type: none"> <li>5 (60-69%) for English as a Home Language or First Additional Language</li> <li>4 (50-59%) for Mathematics</li> </ul>                                                                                                                                                                                                                                                                                                                                    | The primary purpose of this qualification is to provide students with a comprehensive undergraduate education that serves as a solid foundation for pursuing further studies in the field of accounting, specifically the Chartered Accountant (CA) route. Graduates will be well-prepared to enter a CTA (Certificate in the Theory of Accounting) program, which is a necessary step towards achieving the designation of Chartered Accountant CA (SA). Additionally, this qualification also prepares students to practice as Registered General Accountants, positioning them within the second tier of the proposed four-tier accounting structure in Southern Africa. |
| Bachelor of Commerce<br>W63010                        | 25                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language</li> <li>3 (40-49%) for Mathematics or 5 (60 - 69%) for Mathematics literacy</li> </ul>                                                                                                                                                                                                                                                                                           | The objective of this program is to impart knowledge, insight, and understanding of the fundamental principles and practices in commerce-related subjects. It aims to equip candidates with the necessary competencies to make valuable contributions to the business world. The program strives to develop and nurture individuals who possess the skills and abilities to effectively fulfil the roles and responsibilities of business practitioners.                                                                                                                                                                                                                    |
| Bachelor of Commerce in Business Management<br>W63011 | 25                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language</li> <li>3 (40-49%) for Mathematics or 5 (60 - 69%) for Mathematics literacy</li> </ul>                                                                                                                                                                                                                                                                                           | The purpose of this program is to empower students with the ability to think logically and critically, enabling them to make well-informed business decisions. Through the development of advanced problem-solving skills, students will gain the capacity to effectively tackle complex challenges. The program also emphasises the acquisition, organisation, analysis, evaluation, and presentation of information, with a particular focus on the growing significance of electronic-based activities in the modern business landscape.                                                                                                                                 |
| Bachelor of Commerce in Economics<br>W63012           | 25                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language</li> <li>3 (40-49%) for Mathematics or 6 (70 - 79%) for Mathematics literacy</li> </ul>                                                                                                                                                                                                                                                                                           | The aim of this program is to impart knowledge, insight, and understanding of the principles and practices of micro- and macro-economic procedures within the field of economics. By equipping students with this knowledge, the program seeks to foster independent thinking and enhance critical evaluation skills. These skills will empower students to address the socioeconomic challenges of the 21st century in innovative and impactful ways.                                                                                                                                                                                                                      |

# KOMANI CAMPUS

## FACULTY OF EDUCATION

The Faculty of Education is the largest Faculty at IYunivesithi Walter Sisulu and is home to more than 8000 students. The Faculty is located at the Komani Campus of WALTER SISULU with a delivery site at the Mthatha Campus. The Faculty has 6 Departments that offer 21 programmes ranging from Diplomas to Education Doctoral qualifications.

Our undergraduate qualifications prepare teachers to teach in the critical school learning fields of Science, Mathematics, Technical and Vocational, Creative Arts, Humanities, Business and Management and Adult education among others. The above specialisations are offered in the different phases of the schooling system namely, Foundation Phase, Senior and Further Education and Training Phase. Our Postgraduate programmes offer growth and development opportunities to practising teachers and education professionals.

Through these programmes we respond to societal needs in ethically, scholarly, sustainable, technology-infused, and entrepreneurial ways. This is aimed at preparing future-ready graduates, teachers, subject advisors and educational leaders/managers of the highest calibre for the school system in the Eastern Cape, South Africa and globally.

# **BUFFALO CITY CAMPUS**

## **FACULTY OF ENGINEERING, BUILT ENVIRONMENT & INFORMATION TECHNOLOGY**

The Faculty of Engineering, Built Environment and Information Technology is home to approximately 5 000 students and is located at the Buffalo City campus (BCC) with a delivery site at the Butterworth campus (BTW) for some of the engineering programmes.

The faculty offers diploma and advanced diploma programmes in engineering, information and communications technology, and a diploma programme in building technology. There are a total of 13 programmes on offer in the faculty. The programme offering consists of three diplomas and three advanced diploma programmes in civil, electrical and mechanical engineering, respectively, four diploma programmes in information and communications technology (four different streams: support services, business analysis, communication networks, applications development) and two advanced diploma programmes in applications development and communication networks as well as a diploma in Building technology

Graduates from this faculty typically find employment in industry (consulting firms, construction companies, manufacturing and/or automotive sector, IT companies, etc.), State-Owned-Entities (Eskom, Transnet, etc), Local Authorities (Municipalities and District Municipalities) or within the various spheres of Provincial and National Government. Graduates may also use their obtained competencies to become self-employed. Specialisation areas of graduates are varied, and include many fields such as material science, hydraulics, automotive, electronics, design, planning, construction management, quantity surveying, programming, systems analysis, and many other related fields.

## Undergraduate Qualifications offered in the faculty

| Diploma in Building Technology<br>W60001 & W60002    | 24<br><br><br><br><br><br><br><br><br><br>22 EXTENDED CURRICULUM PROGRAMME (ECP) | <p><b>Main stream</b></p> <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language level or better.</li> <li>4 (50-59%) for Mathematics or 5 (60-69%) for Technical Mathematics</li> <li>3 (40-49%) for Physical Science or 4 (50-59%) for Technical Science</li> </ul> <p><b>Extended stream</b><br/>As for main-stream with Provision that applicants who have an NSC achievement rating of 3 (one level below the required levels as mentioned above), i.e. in ONE of the three subjects (Mathematics or Technical Mathematics; Physical Science or Technical Science; English as a Home Language or First Additional Language).</p> | The Diploma in Building Technology is a broad-based, vocationally oriented qualification intended to prepare learners for supervisory and middle management level employment in the building industry and to enable them to provide technical and support services within the fields of Quantity Surveying and Construction Management. The purpose of the Diploma in Building Technology is to train technicians who can execute technical tasks and use and apply their knowledge and judgment in the identification and solving of construction-related problems. This qualification is intended for technician-level employment in the fields of Quantity Surveying and Construction Management. Learners achieving this qualification will have the educational knowledge and skills to perform basic quantity surveying functions associated with tendering, pricing, measuring, payments and final accounts, as well as the ability to perform basic construction management functions associated with construction activities on a building site. Qualifiers should, after initial supervision, be able to apply their skills and related techniques to systematically plan and manage well defined construction issues, while using appropriate terminology, style and structure to communicate effectively with superiors and subordinates and apply management concepts to projects and operations showing awareness of ethics, professionalism, safety and consideration of the social and natural environment. |
| Diploma in Civil Engineering<br>W60003 & W60004      | 24<br><br><br><br><br><br><br><br><br><br>22 EXTENDED CURRICULUM PROGRAMME (ECP) | <p><b>Main stream</b></p> <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language.</li> <li>4 (50-59%) for Mathematics</li> <li>4 (50-59%) for Physical Sciences.</li> </ul> <p><b>Extended stream</b><br/>As for mainstream with provision that applicants who have an NSC achievement rating of 3 (one level below the required levels as mentioned above), i.e. in ONE of the three subjects (Mathematics, Physical Science, or English as a Home Language or First Additional Language) mentioned above will be considered for admission into extended programme.</p>                                                              | The purpose of this qualification is to build the necessary knowledge, understanding, abilities and skills required for further learning towards becoming a competent practicing technician. It is also to train technicians who will meet the criteria for registration as a candidate engineering technician by the Engineering Council of South Africa (ECSA), and who will display competence as part of the engineering team in the execution of technical tasks under remote supervision by using and applying their knowledge in independent judgement in the identification and solution of well-defined civil engineering problems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

The knowledge and skills acquired in this qualification are aligned with industry certification in IT service management and IT governance. This qualification provides a pathway to information systems management, information systems auditing, and information systems security. |

## **MTHATHA CAMPUS**

# **FACULTY OF LAW, HUMANITIES & SOCIAL SCIENCES**

The Faculty of Law, Humanities and Social Sciences comprises 7 departments – African Languages, Arts, Psychology, School of Laws, Social Sciences, Social Work, and Visual Arts. The faculty has an enrollment of almost 3000 students. While its seat is in Mthatha and 6 departments are based there, Visual Arts is based in East London.

The faculty has 8 exciting undergraduate programmes to choose from. These are Diploma in Fashion, Diploma in Fine Art, Advanced Diploma in Fine Art, Bachelor of Arts, Bachelor of Laws, Bachelor of Social Science, Bachelor of Psychology, and Bachelor of Social Work. Graduates in Fashion and Fine Art can pursue careers as designers, stylists, illustrators, curators, brand or gallery managers, textile or visual artists, and creative directors. Those who graduate with a Bachelor of Arts have various graduate opportunities in the entertainment industry, education, and media. Those who study law can, among other possibilities, take up these jobs: academic, attorney, advocate, prosecutor, arbitrator, magistrate, and legal advisor. Graduates with a Bachelor of Social Science find work with multiple government departments which include Arts and Culture, Correctional Services, Education, Justice, Policing, Social Development, and Tourism. Psychology graduates typically find employment in the health sector, public relations, and human resources. Those who study Social Work find work as social workers, counselors, consultants, researchers, and academics.

## Undergraduate Qualifications offered in the faculty

| Diploma in Fashion<br>W66001                                                                                    | 19                                 | <ul style="list-style-type: none"> <li>4 (50-59) for English as a Home Language or as a First Additional Language</li> <li>2 (30-39) for Mathematics or 3 (40-49) for Mathematics Literacy or 2 (30-39) for Accountancy</li> </ul> <p><b>(Students who meet the minimum requirements will be subject to an evaluation to confirm final placement)</b></p>                                                                                                                                                                                              | The purpose of this qualification is to provide the learner with Fashion designing/manufacturing skills to enable him/her to enter into the fashion industry. Projects are both theoretical and skills-based and students are given an opportunity to design and make garments. The student's portfolio of work will serve as evidence of the learner's capabilities within the fashion design environment.                                                                  |
| Diploma in Fine Art<br>W66002                                                                                   | 19                                 | <ul style="list-style-type: none"> <li>3 (40-49) for English as a Home Language or as a First Additional Language</li> </ul> <p><i>In exceptional cases, an excellent portfolio of artworks and the passing of an internal assessment/interview may enable talented artists to enter with an NSC rating of 2 in English.</i></p> <p><b>(Students who meet the minimum requirements will be subject to an evaluation to confirm final placement)</b></p>                                                                                                | The programme provides the educational base required for eligibility for registration for further studies in fine arts. The qualification will enable learners to pursue different career paths within the culture and arts sector and contribute towards the economic sustainability and improvement of the design environment by being entrepreneurs.                                                                                                                      |
| Bachelor of Arts<br>W66004                                                                                      | 25                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language</li> </ul> <p>An achievement in any two subjects as follows:</p> <ul style="list-style-type: none"> <li>4 (50-59%) for IsiXhosa</li> <li>4 (50-59%) for Sesotho</li> <li>4 (50-59%) for Geography</li> <li>4 (50-59%) for History</li> </ul>                                                                                                                                                                                             | This is a general degree that allows students to take 3 subjects at first year and 2 majors at second and third year. The majors must be traceable to level 1. The degree equips students with the necessary undergraduate level knowledge, in preparation for specialisation at Honours level where there is specialisation and knowledge is deepened.                                                                                                                      |

It prepares students for entry into legal practice, careers that require the application of the law and postgraduate studies in law.                                                                                                                                                                                                     |
| Bachelor of Psychology W66022                                                                                   | 26                                 | <p>An achievement in any two subjects as follows:</p> <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>4 (50-59%) for any other African Language</li> <li>4 (50-59%) for Life Science</li> </ul>                                                                                                                                                                                                                                                                            | This four-year degree program is designed to provide students with a comprehensive understanding of cognitive processes, human development, and behaviour. Through the curriculum, students explore various facets of how individuals think, grow, and interact, equipping them with valuable insights applicable in a range of fields.                                                                                                                                      |
| Bachelor of Social Work<br>W66023                                                                               | 26                                 | <p>An achievement in any two subjects as follows:</p> <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>5 (60-69%) for any other African Language</li> <li>4 (50-59%) for Life Sciences</li> <li>4 (50-59%) in any other THREE (3) subjects which are not included on the above list excluding life orientation.</li> </ul> <p>(Character reference checks will be conducted for all admitted students. A negative character reference check may lead to deregistration)</p> | This is a professional 4-year degree. Its knowledge areas include human well-being, social maladies, social development and social justice. Students learn about various models that can enhance quality of life and acquire skills that address social inequality and poverty. The programme aims to produce competitive graduates, responsive to psycho-socio-economic needs of the marginalised, and indigenous diverse communities in an ethical and sustainable manner. |

## **BUTTERWORTH CAMPUS**

# **FACULTY OF MANAGEMENT & PUBLIC ADMINISTRATION SCIENCES**

The Faculty of Management & Public Administration Sciences (FMPAS) is one of the largest Faculties at iYunivesithi Walter Sisulu and is home to approximately 7 500 students. The Faculty is located in the Butterworth Campus of WS and is situated approximately halfway between Mthatha and East London. Certain Faculty programmes are offered at the Buffalo City Campus as well as the Komani Campus.

The Faculty offers programmes ranging from higher certificates to postgraduate programmes in Public Administration. Many of the programme offerings have extended curriculum programmes to provide additional access opportunities for learners into the programmes offered in the Faculty.

Graduates from the faculty are equipped with the skills and competencies that allow them to enter and contribute to various areas within the national and global economy as entrepreneurs and skilled professionals who work in commerce and industry, in both the public and private sectors. Some of our qualifications prepare graduates for specialised areas of employment in radio, television, general media, public relations, hotel management, sport management and tourism

It covers topics such as corporate image and reputation, crisis communication, internal and external communication, media relations, and corporate social investment programs. The program will provide students with the skills and knowledge they need to be successful in a career in public relations. |
| Diploma in Small Business Management<br>W61018                 | 21                                 | <ul style="list-style-type: none"> <li>3 (40-49%) for English as a Home Language or First Additional Language;</li> <li>3 (40-49%) for Mathematics or 3 (40- 49%) for Accounting, or 4 (50 -59%) for Mathematic Literacy;</li> <li>3 (40-49%) for any other two subjects.</li> </ul>                                                                                                                                                                                                                                                                    | This qualification prepares graduates for entry into the world of business. The qualifying learner will have the competence to apply essential business strategies, principles and techniques to start a small, medium or micro-enterprise and to ensure its effective functioning.                                                                                                                                                        |
| Diploma in Sport Management<br>W61019                          | 21                                 | <ul style="list-style-type: none"> <li>3 (40-49%) for English as a Home Language or First Additional Language;</li> <li>3 (40-49%) for any other three subjects.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                             | This qualification aims to provide qualifying learners with applied competence in the analysis, interpretation and application of management principles in the fitness and health, coaching, teaching and retailing sectors of the sports industry.                                                                                                                                                                                        |
| Diploma in Tourism Management<br>W61020                        | 21                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language;</li> <li>3 (40-49%) for Mathematics or 4 (50 -59%) for Mathematic Literacy;</li> <li>3 (40-49%) in any three relevant school subjects</li> </ul>                                                                                                                                                                                                                                                                                         | This program aims to provide students with a comprehensive understanding of the tourism and leisure industries. Upon completion, learners will be equipped with the skills and knowledge to independently manage and integrate specialist activities within the tourism value chain.                                                                                                                                                       |
| Bachelor of Administration<br>W61029                           | 25                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or First Additional Language;</li> <li>4 (50-59%) for any other four subjects.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                              | Students will be able to direct, improve, and manage institutional structures, resources, and functions to improve service delivery in the public sector. The program also aims to prepare students for postgraduate studies and to become fully competent organisational leaders and managers within and across the core functions of an organisation.                                                                                    |

## MTHATHA CAMPUS

### FACULTY OF MEDICINE & HEALTH SCIENCES

The Faculty of Medicine & Health Sciences is located at the Mthatha Campus. The new medical school faculty and administrative buildings are at Sissons Street, Fort Gale (next to Nelson Mandela Academic Hospital). The faculty comprises the School of Medicine with 11 academic departments, as well as the departments of Nursing, Public Health and Rehabilitation Medicine. The faculty offers five undergraduate programs in the following categories: Bachelor of Health Sciences in Medical Orthotics and Prosthetics, Bachelor of Medical Sciences, Bachelor of Medicine in Clinical Practice, Bachelor of Medicine and Bachelor of Surgery, and Bachelor of Nursing. Graduate opportunities in the health sector exist both in public and private sectors, including medical orthotics and prosthetics practitioners, clinician scientists in physiological sciences and biochemistry, clinical associates, medical practitioners, professional nurses, and health promotion practitioners. Broadly, the subject combination should include a Home Language, English, Mathematics, Life Sciences and Physical Sciences

| Bachelor of Medical Sciences<br>W65001                                     | 24                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>4 (50-59%) for any other African Language</li> <li>4 (50-59%) for Mathematics</li> <li>4 (50-59%) for Physical Science</li> <li>4 (50-59%) for Life Science</li> <li>4 (50-59%) in any other subject which is not included on the above list, excluding Life Orientation</li> </ul> <p>(Additional selection criteria will apply when final selections are made, please refer to faculty prospectus for further details)</p> | This three-year programme equips the learner with knowledge and skills in general pre-medical or basic sciences. The program's first year is common with the non-medical sciences offered by the Faculty of Natural Sciences. From year 2, the learner can choose a specific stream of interest (Physiology or Biochemistry) depending on his/her interest for future development. |
| Bachelor of Medicine in Clinical Practice<br>W65002                        | 24                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>4 (50-59%) for any other African Language</li> <li>4 (50-59%) for Mathematics</li> <li>4 (50-59%) for Physical Science</li> <li>4 (50-59%) for Life Science</li> <li>4 (50-59%) in any other subject which is not included on the above list, excluding Life Orientation</li> </ul> <p>(Additional selection criteria will apply when final selections are made, please refer to faculty prospectus for further details)</p> | The general purpose of this three-year bachelor's degree is to train a competent, professional healthcare team member to function effectively as a Clinical Associate (CA) to assist with a defined scope of clinical procedures assisting district hospital doctors and working under their supervision.                                                                          |
| Bachelor of Nursing<br>W65004                                              | 24                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>4 (50-59%) for any other African Language</li> <li>4 (50-59%) for Mathematics</li> <li>4 (50-59%) for Physical Science</li> <li>4 (50-59%) for Life Science</li> <li>4 (50-59%) in any other subject which is not included on the above list, excluding Life Orientation</li> </ul> <p>(Additional selection criteria will apply when final selections are made, please refer to faculty prospectus for further details)</p> | The qualification aims to produce competent professional nurse practitioners within various health service settings. The professional nurse will be qualified with a comprehensive scope that includes obstetric skills, mental health, and primary health care (First level contact and provision of health services with a referral system in operation)                         |
| Bachelor of Health Sciences in Medical Orthotics and Prosthetics<br>W65005 | 24                                 | <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>4 (50-59%) for any other African Language</li> <li>4 (50-59%) for Mathematics</li> <li>4 (50-59%) for Physical Science</li> <li>4 (50-59%) for Life Science</li> <li>4 (50-59%) in any other subject which is not included on the above list, excluding Life Orientation</li> </ul> <p>(Additional selection criteria will apply when final selections are made, please refer to faculty prospectus for further details)</p> | The qualification will produce a well-rounded learner who will be capable of practicing as an orthotic and prosthetic clinician. Medical Prosthetics is a profession that deals with replacing body limbs that are removed as a cause of accident, diseases or surgery. The Medical Orthotics, on the other hand, deals with support and treatment of the weak limbs of the body.  |
| Bachelor of Medicine and Bachelor of Surgery<br>W65005                     | 30                                 | <ul style="list-style-type: none"> <li>5 (60-69%) for English as a Home Language or as a First Additional Language</li> <li>5 (60-69%) for any other African Language</li> <li>5 (60-69%) for Mathematics</li> <li>5 (60-69%) for Physical Science</li> <li>5 (60-69%) for Life Science</li> <li>5 (60-69%) in any other subject which is not included on the above list, excluding Life Orientation</li> </ul> <p>(Additional selection criteria will apply when final selections are made, please refer to faculty prospectus for further details)</p> | This innovative medical programme has been followed at the University since 1992. The programme provides the required knowledge, skills and attitudes to practice medicine in various settings using a PBL and a community-based approach. It will equip the learner to manage diverse health problems in individuals, families and communities the graduate will serve.           |

## **MTHATHA CAMPUS**

### **FACULTY OF NATURAL SCIENCES**

The Faculty of Natural Sciences is located at the Mthatha Campus at WALTER SISULU, but currently offers its programs from two delivery sites: Mthatha and Buffalo City. The Departments of Biological & Environmental Sciences, Chemical & Physical Sciences, Mathematical Sciences and Computing are located on the Mthatha Campus, while the Department of Applied Sciences is in Buffalo City. The faculty is home to over 2000 students and offers 27 science programmes ranging from Diplomas to PHD's.

The faculty provides a diverse range of educational opportunities through its Bachelor of Science and diploma programmes in both basic and applied sciences. The basic science programmes encompass a wide array of subjects, such as biological sciences, chemistry, computer sciences, environmental studies, mathematics, and physics. On the other hand, the applied science programs focus on specialized fields like pest management, analytical chemistry, and consumer sciences. This comprehensive selection of programmes ensures that students can pursue their academic interests and career goals within the realm of science and its practical applications.

The faculty provides a wide range of exciting postgraduate programmes for science graduates who want to pursue advanced studies. Students in life sciences have the option to specialize in entomology, plant biotechnology, marine biology, and other fields that are captivating. Within the faculty, there are accomplished experts in organic chemistry, material and nuclear physics, as well as space sciences. Mathematicians research in the area of Lie symmetry of differential equations. Moreover, the faculty serves as a home to the National Pollution Laboratory and the Centre for Risk and Vulnerability, where students engage in research on water quality and its associated effects.

| Diploma in Analytical Chemistry<br>W64001 & W64002                  | 22                                 | <b>Main Stream</b> <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>3 (40-49%) for Mathematics</li> <li>4 (50-59%) for Physical Sciences</li> </ul>                                                                    | <p>The purpose of the diploma is to offer specialised knowledge and skills that are tailored to respond to the occupational and skills shortages in chemical and chemical-allied industries such as pharmaceuticals, manufacturing, food, mining, petrochemicals, automotive, environmental, wastewater management, pollution control, waste disposal and recycling, agriculture, research, and the health sector. The programmes aim to empower graduates with knowledge to find innovative routes to start-up businesses and develop their business ideas into opportunities that can be exploited by providing a successful product or service in the emerging economy. This programme aims to produce diversified graduates who can contribute immediately and meaningfully to the human resource needs of the chemical and chemical-allied industries. Successful graduates from the programme can register for an advanced diploma in chemistry, which is a gateway to postgraduate qualifications such as a Postgraduate Diploma in Analytical Chemistry, a Master of Science, and doctoral qualifications. Graduates from the programme can occupy technical positions in chemical and chemical-allied industries, such as laboratory technicians, scientists, quality control managers, laboratory managers, or even start their own businesses.</p>                                                                                                                                                                                                     |

| Diploma in Consumer Sciences and Food Nutrition<br>W64004 & W64039  | 22                                 | <b>Main Stream</b> <ul style="list-style-type: none"> <li>4 (50-59%) for English as a Home Language or as a First Additional Language</li> <li>3 (40-49%) for Mathematics</li> <li>4 (40-49%) for Physical Sciences</li> </ul>                                                                    | <p>The purpose of the diploma is to offer specialised knowledge and skills to enable the university to produce graduates who will be able to display competence in the integration and application of science-based food and nutrition theoretical and practical knowledge and culinary skills in food production, food retail, and food service to improve consumer wellbeing. The program's other primary objective is to empower food scientists and nutritionists with the wisdom, expert knowledge, and culinary skills they need to take on the challenge of creating and supplying foods that meet the continuously changing demands of the modern consumer industry brought on by changing lifestyles. The programmes aim to empower graduates with knowledge to find innovative routes to start-up businesses and develop their business ideas into opportunities, increasing the chances of commercialising untapped indigenous food recipes, products, and processes, thereby contributing to job creation, personal fulfilment, and economic wealth. Successful program graduates start their businesses in the Food and Beverage industries. Successful graduates can work as product/recipe developers, food buyers, food production managers, food journalists, market researchers, customer development consultants, food service managers, food and nutrition compliance officers, assistant nutritionists/nutrition advisors, and food quality control personnel, and become productive employees with minimal job orientation and training</p> |

Students are equipped with knowledge in areas such as mechanics, electromagnetism, quantum mechanics, and thermodynamics. Through hands-on laboratory experiments and theoretical coursework, graduates of this program gain strong analytical and problem-solving skills that can be applied to a wide range of scientific fields</p> |
